# **NAME**

curl\_formfree - free a previously build multipart/formdata HTTP POST chain

# **SYNOPSIS**

#include <curl/curl.h>

void curl\_formfree(struct curl\_httppost \* form);

# **DESCRIPTION**

curl\_formfree() is used to clean up data previously built/appended with  $curl\_formadd(3)$ . This must be called when the data has been used, which typically means after the  $curl\_easy\_perform(3)$  has been called.

# **RETURN VALUE**

None

# **SEE ALSO**

 $\boldsymbol{curl\_formadd}(3)$
